ACADEMIC HERALDRY

The history of academic heraldry reaches back into the early days of the university. A statute of 1321 required that all "Doctors, Licentiates, and Bachelors" of the University of Coimbra wear gowns. In England, in the fourteenth century, the statutes of certain colleges forbade "excess in apparel" and prescribed the wearing of a long gown, which may have been counted necessary for warmth in the unheated buildings frequented by medieval scholars. Hoods were used to cover the head until later replaced by the skull cap and eventually by academic caps. Both Cambridge and Oxford have made academic dress a matter of university control to the inclusion of even its minor details; and in Laudian days in Oxford, any tailor who changed the authorized design "even by a nail's breadth" was punished by the vice-chancellor of the University. When American colleges and universities desired to adopt some suitable system of academic apparel, it seemed best to agree on a system which all might follow. Accordingly, there was held on May 16, 1895, at Columbia University, a conference of representatives of the boards of various interested institutions. From that meeting came a code of academic dress for the colleges and universities of the United States, which most institutions of higher learning have adopted.

Gowns

The academic gown for the bachelors degree has pointed sleeves and is designed to be worn closed. The gown for the masters degree has an oblong sleeve, open at the wrist. The sleeve base hangs down in the traditional manner. The rear part of its oblong shape is square cut, and the front part has an arc cut away. The gown is so designed to be worn open or closed. The gown for the doctors degree has bell-shaped sleeves and may be worn open or closed.

Colors

For all academic purposes, including trimmings of doctoral gowns, edging of hoods, and tassels of caps, the colors associated with the different academic disciplines are as follows:

Agriculture	Maize
Business	Drab
Education	Light Blue
Engineering	Orange

Humanities, Arts and Social Sciences	White
Natural Resources Science	Russett Gold-Yellow
School of Graduate Studies (EdD, PhD)	Gold

The white ribbon with the Greek Key on the robe of a graduate identifies an inductee into Phi Kappa Phi, the National Scholastic Society. Those wearing gray collars and a medallion are Mortar Board Senior Honor Society members, the National Academic & Service Society. A gold braided cord draped over the cowl will distinguish a graduate of Honors.

Hoods

Academic hoods are worn by recipients of advanced degrees. The master degree hoods are three-and-one-half feet in length and are lined with the official color or colors of the college or university conferring the degree, which at Utah State University are navy blue and white, displayed in a heraldic chevron. The doctoral hood consists of a larger and longer assemblage of institutional color draped over the recipient's shoulders and falling well down the back. The binding or edging of the hoods is of velvet or velveteen, three inches wide and five inches wide for the masters and doctors degree, respectively.

Caps

Academic caps come in two forms: the traditional mortarboard (from Oxford), a square cap; and a soft cap which resembles an oversized beret (the Cambridge model). The mortarboard, used by Utah State University, is worn with a tassel. Black tassels designate any degree; colored tassels designate major field of learning, and gold tassels indicate doctors and governing officials of institutions.

Academic Procession

The commencement procession originates at the University quadrangle and the line of march then extends west around Old Main and then north to the Spectrum. The procession is composed of three divisions: (1) color guard, University president, Regents and the Board of Trustees, administrative officers, and special guests; (2) the faculty; and (3) candidates for degrees. The procession will stop at the tunnel entrance to the Spectrum, the first two divisions dividing so that the candidates for graduation pass between them and enter the hall first.

Commencement Speaker Honorary Degree

E. Gordon Gee

has been described in two words, focus and execution, which capture the vision of the Chancellor of Vanderbilt University and champion of progress. Under Chancellor Gee's leadership at Vanderbilt for the past three years, the institution has become a community where simplicity, clarity, agility and accountability are hallmarks. But such progress should come as no surprise to those who know the history of this man from Vernal, Utah. □ He has served as president of Brown University, Ohio State University, the University of Colorado and West Virginia University. Returning to his Utah roots, he has also served as Assistant Dean for the College of Law at the University of Utah and Associate Dean and Professor at the J. Reuben Clark Law School at Brigham Young University. □ Experience outside higher education has brought focus to Dr. Gee's life as well. Gee held the position of Judicial Fellow and Senior Staff Assistant to United States Supreme Court Chief Justice Warren Burger. □ Nationally, he is recognized for his positions with such organizations as the steering committee for a new National Center for Public Policy and Higher Education and the College Board's Commission on Writing in America's Schools and Colleges, an advisory committee of experts who will help develop the new SAT exam. □ Dr. Gee holds a joint degree in law and education from Columbia University and has written extensively about both topics. □ Aside from all this, he still has time for his daughter, Rebekah, and his wife, Constance, who also contributes to the success of Vanderbilt as a professor of public policy and education. All of the above demonstrate the focus and execution of a man with much to contribute. It is for these contributions that Utah State University recognizes E. Gordon Gee with the honorary degree, **Doctor of Humane Letters**.

Honorary Degree

Gregory C. Carr

has traveled a path beyond his early life in Idaho Falls, Idaho, to all parts of the globe, whether in person or through his ideas, innovations and actions. □ He distinguished himself early, earning a degree in history at Utah State University and becoming valedictorian from the College of Humanities, Arts and Social Sciences. Next came the elite halls of Harvard and the Kennedy School of Government, where he earned a master's degree in public policy. □ Venturing into the business world, he co-founded Boston Technology, an international telecommunications firm. He then moved on to the world of the web — the World Wide Web — and was Chair of Prodigy, an Internet service provider from 1996–98. □ In 1998, Mr. Carr resigned from his for-profit boards and dedicated himself full time to philanthropy. “I wanted to get back to my roots in the humanities,” he said in an interview. He formed the Carr Foundation to support human rights education and the arts. At Harvard, he formed the Carr Center for Human Rights Policy. His energies also focused on his home state, where he has launched a five-year human rights campaign with the Association of Idaho Cities. He purchased a former neo-Nazi supremacist site in Northern Idaho and is working with local leaders to replace it with a human rights education center. The Anne Frank Human Rights Memorial in Boise and the Museum of Idaho in Idaho Falls have received his support. □ From creating a literary journal to establishing the Market Theatre, his interests are far reaching and always support the human cause. □ For his work in making the world a better place, Utah State University is proud to confer on Gregory C. Carr the honorary degree, **Doctor of Humanities**.

Honorary Degree

Larzette G. Hale-Wilson

has served in many roles throughout her life, including professor, university administrator, and a Certified Public Accountant. ☐ Dr. Hale-Wilson forged a pathway for her success, becoming noticeable in her days as an undergraduate at Langston University in Oklahoma. But it wasn't until Dr. Hale-Wilson earned her master's degree from the University of Wisconsin, passed the Certified Public Accountant exam and then earned her doctorate from that same university, that she received recognition at the national level. Dr. Hale-Wilson was the first Black woman in the nation to have both a doctorate degree and to become a Certified Public Accountant. ☐ Dr. Hale-Wilson's career began in 1943 when she served as accounting teacher and then Chair of the Business Administration Department at Bethune-Cookman College in Florida. She also served as Professor of Accountancy at Clark College in Atlanta, Georgia, and again at Langston University. Dr. Hale-Wilson served Utah State University as well. She was a Utah State professor for 18 years, 13 of which were spent as the Head of the School of Accountancy. ☐ Active in the accounting profession, Dr. Hale-Wilson has contributed to her field in many ways throughout the years, including serving as the National President of the Woman's Society of CPAs and serving as the Chair of the Education Executive Committee of the American Institute of Certified Public Accountants. She has also been a member of the Utah State Board of Regents. ☐ For her years of service and commitment to the accounting profession, Utah State University is proud to bestow upon Larzette G. Hale-Wilson the honorary degree, **Doctor of Business**.

Honorary Degree

John W. Williams

is long-time restaurateur and historic preservationist who has spent his life changing the face of a city, and the merits of his accomplishments are visible from almost every angle of Salt Lake City. □ His company, Gastronomy, Inc., has provided the citizens of Utah with nine of Salt Lake's finest restaurants, which are all housed in historic buildings. But the company has also taken the lead again and again in taking risks in an effort to revitalize the look and feel of Utah's capital. Over the past 20 years, the Gastronomy organization has turned historic, dilapidated structures that have been abandoned into profitable, thriving businesses. In each instance, new businesses and energy have transformed neighborhoods and offered new hope to communities. Streets that were entirely devoid of business are now bustling centers of activity because of Gastronomy's commitment to the city's rejuvenation. □ Most recently, Gastronomy provided the vision and leadership to cultivate investment in the Gateway district when few would invest in Salt Lake's warehouse area. Its investment is now a cornerstone of the burgeoning Gateway district and one of Salt Lake's most visually prominent structures at the entrance to the city. □ Mr. Williams has received a long list of honors for his many accomplishments, including the Governor's Award for Excellence, the Utah Heritage Foundation "Citizen of the Year" Award, the Downtown Alliance Special Achievement Award, and the National Trust for Historic Preservation Honor Award. He was named Entrepreneur of the Year in 1997. □ Mr. Williams also has been involved in countless community activities throughout his years as business owner, including affiliations with the Utah AIDS Foundation, the Salt Lake City Olympic Organizing Committee, Guadalupe Schools, and numerous arts, business and education organizations. □ For his commitment to the preservation of Utah's historic heritage and for his on-going business and community involvement, Utah State University is proud to confer on John Warren Williams the honorary degree, **Doctor of Arts**.

University Outstanding Graduate Mentor and D. Wynne Thorne Research Awards

Steven D. Aust

has always been a strong proponent of student mentoring. Nearly fifty graduate students and sixteen postdoctoral trainees have learned under his leadership. His reputation has spread worldwide, with students coming from Japan, Italy, Poland, Finland, Austria, India, and Sri Lanka to work with him. ☐ Dr. Aust encourages problem solving, rational thought processes, and scientific reasoning. ☐ He is not only a tremendous researcher, but a gifted teacher as well. Dr. Aust enjoys teaching and training students. He is aware of and perceives the emotional state of his students lending support to them in whatever way he can. ☐ Dr. Aust maintains high standards and morale in his laboratory, creating an atmosphere where ideas can be exchanged freely among graduate and undergraduate students, postdocs, and research assistants. ☐ For his ability to teach, to motivate, and to inspire, Utah State University is proud to honor Steven D. Aust with the **2003 University Outstanding Graduate Mentor Award**.

Steven D. Aust is a Professor of Chemistry and Biochemistry. ☐ He is an internationally recognized expert in a number of fields, including the toxicology of polyhalogenated aromatic hydrocarbons, lipid peroxidation, the role of iron in the deleterious oxidation of biomolecules, and the degradation of lignin and environmental pollutants by white-rot fungi. ☐ Over 59 graduate students and 26 postdoctoral trainees have received training under his supervision. ☐ Dr. Aust's research has been funded by NIH, NSF, the Department of Agriculture, EPA, and the U. S. Army and Navy, as well as private corporations. His work is cited some 500 times each year in the scientific literature. ☐ He is a member of six professional societies and a Fellow of The Oxygen Society and The Academy of Toxicological Sciences. He has served on grant review panels for NIH, NSF, EPA, DOE, ONR, the Italian Ministry of University and Scientific Research, and the New Zealand Health Research Council. ☐ For his outstanding accomplishments, Steven D. Aust is honored as the **2003 D. Wynne Thorne Researcher of the Year**.

Eldon J. Gardner Teaching Award

E_dwin R. Stafford

has been recognized three times as the “Teacher of the Year” from the College of Business since 1977. □ With a reputation as a student-oriented professor, Dr. Stafford teaches primarily the undergraduate and graduate global marketing strategy courses where students take on the role of consultants to conduct “hands-on” marketing audits for companies. □ A strong emphasis is placed on learning how to obtain and interpret strategy information from print and Internet sources and applying strategy decision-making frameworks. This empowers students with the skills to conduct similar projects on the job. □ In his lectures, he incorporates current events from the business press to bridge marketing theory and practice. Dr. Stafford also engages in educational outreach with the local high school, other departments and universities, and the community, and his outreach was recognized recently with the “Meritorious Achievement in Environmental Education Award” from the Salt Lake Organizing Committee for the Olympic Winter Games of 2002. □ Dr. Stafford’s research centers on multi-sector collaboration for the diffusion of cleaner technology, and his research has been published in both business and environmental policy journals. □ He is also a frequent op-ed writer for newspapers and magazines about the business opportunities of “going green.” In the coming year, he will engage students in a project to identify strategies for jumpstarting renewable energy markets in Utah. □ For his outstanding achievements, Utah State University is pleased to honor Edwin R. Stafford with the **2003 Eldon J. Gardner Teaching Award**.

E. G. Peterson Extension Award

DeeVon Bailey

is a professor of Economics and an Extension Economics Specialist. DeeVon has provided excellent educational programs for Extension clientele during his 20-year tenure at Utah State University. □ DeeVon's agricultural background, coupled with his keen ability to analyze systems as they relate to economic principles, has had a huge impact on Utah's agricultural economy. □ His understanding of world agricultural economies has been, and will continue to be, a guiding light in the development of trade agreements. These agreements will give Utah farm families hope when things look bleak. □ In addition, DeeVon loves research. He has been highly responsive to field faculty needs by involving them in statewide programs, helping them publish in professional journals, and through research projects where he has taught them research methodology and interpretation of that research. □ DeeVon has had the superb ability to successfully navigate the challenges of a split appointment between creating new knowledge through his research appointment and disseminating that knowledge to Extension clientele who immediately use it to develop better and more efficient agricultural systems, and also by preparing students who are developing themselves for future agricultural careers. □ DeeVon Bailey has truly been an ideal educator, researcher and service provider for Utah State University, the State of Utah and the world and thereby is honored with the **2003 E. G. Peterson Extension Award**.

Teaching Excellence Awards

Through an extensive selection process involving both students and faculty in the various academic colleges, seven members of the faculty have been designated for special recognition for excellence in teaching representing the seven colleges of the University: Agriculture; Business; Education; Engineering; Humanities, Arts and Social Sciences; Natural Resources; and Science. From among the seven, The Eldon J. Gardner Teaching Award recipient is chosen; the six remaining follow:

College of Agriculture

Tamara S. Vitale

is a Clinical Assistant Professor in the Department of Nutrition and Food Sciences. She teaches junior-and senior-level students in the Dietetics Program with an emphasis on community nutrition, communication and counseling skills and senior practicum experiences. She has developed numerous new courses since coming to USU. She creates a casual classroom atmosphere and teaches with a positive, flexible and approachable style that is conducive to learning and, at the same time, allows students to enjoy the process and develop confidence. She helps students identify their unique strengths, talents, and interests and works to provide specific opportunities that allow professional and personal growth in those areas. Tamara has fostered professional and community networking that allows many options for student practicum projects, group and honor projects, and volunteer experiences. She provides diverse opportunities for students to engage with the community while they provide services such as health fairs, cooking demonstrations and nutrition education to audiences of all ages.

College of Education

J. Freeman King

is a professor in the Department of Communicative Disorders and Deaf Education. During his 12 years of service at Utah State University, he has developed the Deaf Education program into one of the best training programs in the United States. As a teacher he is stimulating, creative, demanding, and caring. Students admire him and work hard to reach his high expectations of their performance. Dr. King cares deeply for each student and devotes personal time mentoring individuals; meeting with them, critiquing their teaching, encouraging their improvement, demonstrating alternative methods, and stimulating their individual ideas. In the classroom, Dr. King establishes a warm, interactive style where students feel comfortable asking questions and interacting with new ideas. He also expects students to come to class prepared to discuss the topics being addressed during the class times and the students understand that they will need to be prepared to interact with him. Philosophically, Dr. King has dedicated his professional career to implementing new ideas and helping students question the status quo.

Teaching Excellence Awards

College of Engineering

Michael J. Johnson

for the second year in a row has been selected by the students as the Teacher of the Year for the Civil and Environmental Engineering Department. Mike is an outstanding teacher and mentor, and he has a very active research program. He is sensitive to the needs of his students and they are a priority in his busy schedule. One student stated, “he is very knowledgeable about the subject he teaches. Yet, he seems to remember what it was like not to know. This way he is sympathetic to student’s needs.” Another student mentioned “his lectures are well structured and prepared in advance, and the object lessons he shares are always easy to follow and well tailored to the current subject.” Some students have mentioned that they weren’t even interested in the area of hydraulics until taking a class from Mike. Now, they are emphasizing that area and some are going on for their master’s degree. Mike has a joint appointment with the Utah Water Research Laboratory and in that capacity hires many students to work on his project which provides a great experience for them.

College of Humanities, Arts, and Social Sciences

Vern J. Budge

has been in the Department of Landscape Architecture and Environmental Planning for 36 years. His passion has been designing and teaching the three-course landscape construction series. During his tenure, Professor Budge has developed one of the most innovative and rigorous construction course sequences offered in any landscape architecture program. His lectures are stimulating, and the projects provide challenges, requiring students to think creatively, master and apply site engineering principles, and concern themselves with the aesthetics of what they design. He has earned a national reputation for his site engineering expertise and has been asked by the national licensing board for landscape architects to grade the construction section of the Unified National Exam on three different occasions. This recognition by national professional peers is offered to very few faculty nationwide. Students appreciate Vern as a mentor and have selected him as the LAEP Department Professor of the Year six times.

Teaching Excellence Awards

College of Natural Resources

Fred Provenza

joined the faculty of the College of Natural Resources in 1982, after completing his MS and PhD at Utah State University. Dr. Provenza interacts with a large cross-section of students in the required course NR 3000. Normally, this is a recipe for apprehension on the part of undergraduates, who believe that such a course can't possibly be focused on their interest. In this case, they are in for a huge surprise, as the course is so broad and general that Dr. Provenza believes it should impact every aspect of their life. His "systems approach" to management includes management of their life and activities as well as natural resources, and he doesn't mean in a "day-planner" kind of way . . . ultimately the course addresses a series of natural resource issues, and forces students to think about issues in a way much deeper and more profound than they would have thought possible a few weeks earlier. He challenges students to think, explore, and learn by maintaining a non-threatening environment and by making it clear that everyone is a student regardless of their level of education. He offers a universe of ideas and asks students to consider how they might apply those ideas to their own understanding. He doesn't teach "how things are, rather how things might be."

College of Science

David Peak

revels in the surprise of discovery—both his students' and his own. His favorite mantra is "research is teaching." In his courses, students experience science by engaging in exercises he designs that encourage them to be creative, to make guesses and perform follow-up observation and synthesis. Over the years, Peak has championed and supported student learning outside of formal courses in many venues—as a faculty guide for USU's Get Away Special Program, as a founding member of the Council on Undergraduate Research and as the Chair of the Governing Board of the National Conference on Undergraduate Research. In 1996, the American Physical Society recognized his mentoring of students with its Prize for Research Done with Undergraduates. For Peak, a related passion is uncovering connections between seemingly unrelated things. His book, *Chaos Under Control*, and his USU general education course—Science, Art, and Music—for example, are explorations of how the physical universe shapes our need to make and enjoy art.

Department Teaching Excellence Awards

The Department of Geology demonstrates outstanding commitment to fostering a culture of learning excellence based on an educational tradition that stresses the importance of engaging students in the learning process. In addition to dynamic and exciting learning experiences in classrooms and laboratories, the department exposes students to first-hand experience in the natural world as they embark on their study of geoscience. All Geology students at Utah State have opportunities to engage in field and lab experiences, develop critical thinking skills and actively participate in the discovery process that is central to scientific inquiry. The Department of Geology maintains a strong commitment to engaging both undergraduate and graduate students in research projects in which faculty members provide guidance while students make their own discoveries.

The Department of Geology systematically nurtures its faculty members in their development of exemplary teaching skills through a comprehensive teaching peer review process that benefits both the observer and the observed. The department emphasizes teaching ability as a criterion in hiring, consideration for merit pay increases, tenure and promotion decisions. New faculty members are assigned teaching mentors who work closely with them to help them improve their teaching skills. All faculty members are encouraged to attend workshops and meetings devoted to pedagogy and to share the insights that they gain with their colleagues. Utah State University presents the 2003 Department Teaching Excellence Award with pride and gratitude to the Department of Geology.

The Department of Political Science demonstrates a commitment to fostering a culture of learning excellence that is based on inspiring its students to become independent and critical thinkers. The development and implementation of innovative teaching strategies are actively encouraged and rewarded within the Department. A casual stroll through the halls of the Political Science department exposes one to the effervescent collegiality that is manifest through lively informal discussion spilling out of the offices, lounges and the department library. This department fosters an atmosphere where every minute is a teaching moment rather than confining learning solely to the classroom. Outside of the classroom, the department sponsors a very active internship program each year where students gain first-hand experience with the government and have an opportunity to apply their critical thinking skills. Internships cover a broad spectrum of opportunities at local, state and federal levels of government and in executive, legislative and judicial branches. The department's culture of learning excellence is also reflected in the many faculty members who enthusiastically participate as advisors and mentors to student organizations on campus. In recognition of outstanding commitment to foster a department culture that meaningfully values learning excellence Utah State University presents the 2003 Department Teaching Excellence Award to the Department of Political Science.
